

CrowdStrike Named a Frost Radar™ Leader in Cloud-Native Application Protection Platforms (CNAPP) for Third Consecutive Year

CrowdStrike recognized as an innovation and growth leader, delivering a complete CNAPP to stop breaches across every area of enterprise cloud risk—from infrastructure to applications, data and AI models

AUSTIN, Texas--(BUSINESS WIRE)--Dec. 6, 2024-- [CrowdStrike](#) (NASDAQ: CRWD) today announced it has been named a Leader in the [2024 Frost Radar™: Cloud-Native Application Protection Platforms \(CNAPP\)](#) for the third consecutive year. CrowdStrike was recognized as a leader in innovation and growth for its ability to simplify and scale cloud security through a single, unified platform. [CrowdStrike Falcon® Cloud Security](#) provides global customers with unified code-to-cloud protection to stop cloud breaches across every area of enterprise cloud risk.

CrowdStrike sets the standard for hybrid and multi-cloud protection by combining advanced cloud detection and response (CDR) capabilities with the most comprehensive CNAPP on the market. Backed by world-class threat hunting and intelligence, CrowdStrike delivers a single, unified platform that stops cloud breaches and secures workloads across infrastructure, applications, data, identities, AI models and SaaS environments. Frost & Sullivan recognized this industry-leading approach, stating in the report that "CrowdStrike Falcon Cloud Security delivers excellent capabilities to address modern cloud security challenges," with broad coverage across cloud-native and Windows-based environments. The report further highlights that the Falcon platform "offers advanced runtime protection, CDR, extensive platform support, and seamless integration with its XDR and MDR services, making it a leading choice for organizations seeking real-time cloud threat management."

This comprehensive approach has firmly established CrowdStrike's leadership, with Frost & Sullivan noting that, "CrowdStrike remains a leader in this Frost Radar, excelling in both innovation and growth indices due to its unified cloud security platform, consistent performance, and tremendous growth over the past four years," and underscores that CrowdStrike is "one of the fastest-growing players" in the industry.

"Adversaries are evolving faster than ever, exploiting the gaps created by tools marketed as CNAPPs that only scratch the surface with basic CSPM or vulnerability management," said Raj Rajamani, head of products at CrowdStrike. "CrowdStrike's recognition as a Leader in the Frost CNAPP Radar for the third consecutive year validates our ability to deliver a comprehensive solution that doesn't just identify risks—it actually stops breaches. Falcon Cloud Security empowers organizations to close critical gaps, outpace threats, and scale their security for the future on a single, unified platform."

About CrowdStrike

[CrowdStrike](#) (NASDAQ: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: We stop breaches.
